CONTENTS OF VOLUME 68

NUMBER 1—10 SEPTEMBER

PAGE

Time-invariant 2 DOF multivariable LQG predictive controllers
M. J. GRIMBLE 1

Averaging, aggregation and optimal control of singularly perturbed stochastic hybrid systems
C.-C. TSAI and A. H. HADDAD 31

Solvability conditions for disturbance decoupling problems with static measurement feedback
B. M. CHEN 51

Controllability and Hermite indices of matrix pairs
I. ZABALLA 61

A condition for dynamic feedback linearization of control-affine nonlinear systems
M. GUAY, P. J. MCLELLAN and D. W. BACON 87

Design method of exact model matching control for finite Volterra series systems
O. YAMANAKA, H. OHMORI and A. SANO 107

A multivariable Steiglitz–McBride method: stationary points and *a priori* error bound
M. MBOUP, P. A. REGALIA and M. ASHARI 125

A chattering control based algorithm for nonlinear optimal control problems with bounded controls restricted to non-convex sets
J. IMAE 155

Adaptive identification of continuous-time systems in the presence of noise
M. VELLEKOOP and A. BAGCHI 171

Improving the observer-based FDI design for efficient fault isolation
Z. YUAN, G. C. VANSTEENKISTE and C. WEN 197

GPC using a delta-domain emulator-based approach
M. B. LAURITSEN, M. ROSTGAARD and N. K. POULSEN 219

NUMBER 2—20 SEPTEMBER

Neural network system identification for improved noise rejection
D. C. HYLAND, E. G. COLLINS JR, W. M. HADDAD and D. L. HUNTER 233

Trajectory tracking and robust stability for a class of time-delayed flexible-joint robotic manipulators
G. CHEN, A. DESAGES and P. JULIÁN 259

Adaptive servomechanism controller with an implicit reference model
V. O. NIKIFOROV 277

Dual $\mathcal{J}$-spectral factorization
P. PARK and T. KAILATH 287

Rational model data smoothers and identification algorithms
S. A. BILLINGS and K. Z. MAO 297

Algorithms for minimal model structure detection in nonlinear dynamic system identification
K. Z. MAO and S. A. BILLINGS 311

A robust high-order P-type iterative learning controller using current iteration tracking error
Y. CHEN, C. WEN and M. SUN 331

PAGE

Robust nonlinear fault diagnosis in input–output systems
A. T. VEMURI and M. M. POLYCARPOU 343
On the discretization of single-input single-output bilinear systems
A. DUNOYER, L. BALMER, K. J. BURNHAM and D. J. G. JAMES 361
Variable structure system theory based disturbance identification and its applications
X. CHEN and T. FUKUDA 373
Receding horizon H^∞ tracking control for time-varying discrete linear systems
J.-W. LEE, W. H. KWON and J. H. LEE 385
A decentralized control design method for model-matching robustness problems
J.-K. SHIAU, G. N. TARANTO and J. H. CHOW 401

NUMBER 3—OCTOBER

A bilinear fault detection filter
D. YU and D. N. SHIELDS 417
Modelling dynamic systems using finite elements
C. S. BERGER 431
Symbolic computation of harmonic balance equations
J. C. PEYTON JONES, M. ZHUANG and I. ÇANKAYA 449
A revisited Popov criterion for nonlinear Lur'e systems with sector-restrictions
POOGYEON PARK 461
Robust controller for multiplicative uncertainty: the time-varying discrete case
V. IONESCU 471
L_2 and L_2–L_∞ model reduction via linear matrix inequalities
K. M. GRIGORIADIS 485
Robust controller design for parametrized uncertain plants by synergizing QFT and Q-parametrization
T.-S. CHANG and C.-Y. CHANG 499
On the design of robust internal model-based controllers
G. MURAD, D.-W. GU and I. POSTLETHWAITE 513
An investigation into robust force control through a constrained flexible beam
G. D. WOOD and J. WOODHOUSE 539
Upper and lower bounds of the solutions of the discrete algebraic Riccati and Lyapunov matrix equations
C.-H. LEE 579
Model reference robust control for MIMO systems
H. AMBROSE and Z. QU 599
Simplex-type variable structure controllers for systems with non-matching disturbances and uncertainties
B. M. DIONG and J. V. MEDANIC 625
Adaptive weighted minimum prediction uncertainty control
A. TZES and K. LE 657
Nonlinear feedback stabilization by tangential linearization
K. REIF, K. WEINZIERL, A. ZELL and R. UNBEHAUEN 673

NUMBER 4—10 NOVEMBER

A singular perturbation approach for tracking control of a parallel robot including motor dynamics
L. BEJI and A. ABICHOU 689
Spray control
A. EL JAI, K. KASSARA and O. CABRERA 709
Co-(J'', J)-lossless co-conjugations and co-(J'', J)-lossless factorizations of linear time-varying systems
P. H. LEE, H. KIMURA and Y. C. SOH 731

PAGE

Feedback control of affine nonlinear singular control systems
X. LIU and S. ČELIKOVSKÝ 753
On the approximation of non-proper control laws
M. BONILLA, M. MALABRE and M. FONSECA 775
Robust model predictive control of stable linear systems
T. A. BADGWELL 797
Bounded tracking for non-minimum phase nonlinear systems with fast zero dynamics
C. J. TOMLIN and S. S. SASTRY 819
Robust stabilization of a triple inverted pendulum–cart
G. A. MEDRANO-CERDA 849
Laguerre filter reduced-order l_1 identification
D. S. WALL and S. M. VERES 867
Existence of optimal controls for continuous time infinite horizon problems
M. L. BELL, R. W. H. SARGENT and R. B. VINTER 887
Finite pools and zeros of linear systems: an intrinsic approach
H. BOURLÈS and M. FLIESS 897
Discretized LMI set in the stability problem of linear uncertain time-delay systems
K. GU 923
On global feedback stabilization of nonlinear non-autonomous systems
M. I. GIL' and A. AILON 935
Correspondence
A note on 'The asymptotic stability of linear autonomous systems with commensurate time delays'
J. S. LOU and P. P. J. VAN DEN BOSCH 943
Comment on 'Modified least squares algorithm incorporating exponential resetting and forgetting
Z. HAN and P. M. FRANK 947

NUMBER 5—20 NOVEMBER

Combined direct and indirect adaptive control of constrained robots
H. YU and S. LLOYD 955
Passivity-based control of nonlinear chemical processes
H. SIRA-RAMÍREZ and M. I. ANGULO-NÚÑEZ 971
Optimal nonlinear disturbance rejection control for nonlinear cascade systems
W. M. HADDAD, V.-S. CHELLABOINA and J. L. FAUSZ 997
Truncation of nonlinear system expansions in the frequency domain
S. A. BILLINGS and Z.-Q. LANG 1019
Weighted adaptive minimum variance controller with unknown input coefficient
R. LI and G. GENG 1043
Cramér–Rao bounds for a class of systems described by Wiener and Hammerstein models
A. E. NORDSJÖ 1067
An adaptive control system design using a memory based learning system
Y. HIRASHIMA, Y. IIGUNI and N. ADACHI 1085
On autoregressive models, the parsimony principle, and their use in control-oriented system identification
P. M. MÄKILÄ 1103
Obtaining smoother singular arc policies using a modified iterative dynamic programming algorithm
A. THOLUDUR and W. F. RAMIREZ 1115
On almost-sure stabilization of discrete-time jump parameter systems: an LMI approach
J. EZZINE and D. KAVRANOĞLYU 1129

PAGE

Eigenstructure assignment in descriptor systems via proportional plus derivative state feedback
G.-R. DUAN and R. J. PATTON 1147
Generalized transfer functions and input–output equivalence
M. HOU, A. C. PUGH and G. E. HAYTON 1163
Stochastic optimal control under randomly varying distributed delays
N.-C. TSAI and A. RAY 1179
Correspondence
Comments on the paper 'Some new results on closed-loop stability in the presence of control saturation'
S. TARBOURIECH and C. BURGAT 1203

NUMBER 6—DECEMBER

Flight control for mixed-amplitude commands
J. M. BUFFINGTON and D. F. ENNS 1209
Decentralized variable-structure control design for uncertain large-scale systems with series nonlinearities
K.-C. HSU 1231
Bifurcation based nonlinear feedback control for rotating stall in axial flow compressors
G. GU, A. SPARKS and S. BANDA 1241
Nonlinear modelling and control of electrically stimulated muscle: a local model network approach
H. GOLLEE and K. J. HUNT 1259
Adaptive backstepping control design for linear multivariable plants
Y. LING and G. TAO 1289
Approximate models for adaptive feedback linearization
M. FRENCH and E. ROGERS 1305
Robust issues in exact model matching
K. ICHIKAWA 1323
A Wiener–Hopf approach to trade-offs between stability margin and performance in two- and three-degree-of-freedom multivariable control systems
J. J. BONGIORNO JR, F. KHORRAMI and T. C. LIN 1337
Modelling and robust control of uncertain dynamical systems using fuzzy set theory
M. BEN GHALIA 1367
Analysis and design of minimum-phase zeros of sampled systems
V. FELIU and J. A. CERRADA 1397
Simultaneous stabilization using evolutionary strategies
G. FERNÁNDEZ-ANAYA, S. MUÑOZ-GUTIÉRREZ, R. A. SÁNCHEZ-GUZMÁN and W. W. MAYOL-CUEVAS 1417
A local approach to solving the inverse minimax control problem for discrete-time systems
M. M. KOGAN 1437
Input–output linearizing nonlinear model predictive control
M. SOROUSH and H. M. SOROUSH 1449
Synthesis of robust-performance controllers using matrix experiments and analysis of variance
C.-D. YANG, H.-C. TAI and F.-B. YEH 1475
Subject Index 1499
Author Index 1503
